## *Ringwood Footbridge - Case study.*

After we had manufactured the new footbridge for the Footscray railway station, we were approached by Fulton Hogan who required a footbridge to cross Maroondah highway at Ringwood. After detailed discussion Fulton Hogan provided Sutcliffe with a purchase order and the Footbridge fabrication started.

Delivery times were critical due to shutdown times for this major arterial road so as not to affect anybody's daily commute.

On the bridge manufactured for Fulton Hogan.

Under the bridge looking South.

The schedule was strictly adhered too, with all welding being tested and passing to ensure the safety of the structure. This project was completed on time and on budget providing a landmark for Ringwood.
